## **STATEMENTS OF ELIGIBILITY FOR CLASS A LOW POWER TELEVISION STATION STATUS TENDERED FOR FILING**

On November 29, 1999, the Community Broadcasters Protection Act of 1999 was signed into law. That legislation provides that a low power television licensee may convert the secondary status of its station to the new Class A status, provided it can satisfy certain statutorily-established criteria.

To become eligible for a Class A certificate of eligibility, the licensee's station must, during the 90-day period ending November 28, 1999, have: (1) broadcast a minimum of 18 hours per day; (2) broadcast an average of at least three hours per week of programming produced within the market area served by the station or by a group of commonly-controlled low power television stations; and (3) been in compliance with the Commission's regulations applicable to the low power television service. In the event that a low power television licensee is not able to satisfy the foregoing criteria, the Commission is empowered by the legislation to issue a certificate of eligibility if it determines that the public interest, convenience and necessity would be served thereby. The legislation also provided that licensees intending to seek Class A designation file a certification of eligibility with the Commission no later than January 28, 2000.

Statements of Eligibility for Class A Low Power Television Station Status have been filed on or before January 28, 2000 by the entities listed in Attachment A.
