Released: October 28, 2010

## **FREEZE ON THE FILING OF APPLICATIONS FOR NEW DIGITAL LOW POWER TELEVISION AND TV TRANSLATOR STATIONS**

Effective immediately, the Media Bureau announces a freeze on the filing of applications for new digital low power television (LPTV) and TV translator stations and major changes to existing analog and digital LPTV and TV translator facilities in so-called “rural areas.” On August 25, 2009, the Media Bureau began accepting applications on a first-come, first-served basis for new digital LPTV and TV translator stations and for major changes to existing analog and digital LPTV and TV translator facilities in so-called “rural areas.”<sup>1</sup> Applications have been accepted since that date.

Subsequent to the Media Bureau beginning to accept LPTV and TV translator applications in rural areas, the National Broadband Plan was released.<sup>2</sup> The Broadband Plan announced an effort to identify 500 megahertz of spectrum that can be reallocated from existing uses to enable the expansion of new mobile broadband service.<sup>3</sup> To aid in this endeavor, the Broadband Plan recommended, among other things, that the Commission initiate a rulemaking proceeding to reallocate 120 megahertz from the broadcast television bands, and also to consider methodologies for repacking full-power television channels to increase the efficiency of channel use.<sup>4</sup>

To permit the Commission to evaluate its reallocation and repacking proposals and their impact on future licensing of low power television facilities, the Media Bureau deems it appropriate to freeze the acceptance of additional applications for new digital LPTV and TV translator facilities, as well as applications for major changes to existing analog and digital LPTV and TV translator facilities, in rural areas. Furthermore, the Media Bureau has been accepting these applications since August 25, 2009, and believes that those parties interested in seeking to construct new digital low power television facilities in rural areas have had sufficient time to submit their applications. Following the conclusion of the Commission’s broadband rule-making proceedings, the Media Bureau will consider an appropriate date to

---

<sup>1</sup> See “Commencement of Rural, First-Come, First-Served Digital Licensing,” *Public Notice*, 24 FCC Rcd 8911 (MB 2009). Commencement of nationwide, first-come, first-served digital licensing was set to commence on January 25, 2010, was later postponed to July 26, 2010, and then postponed indefinitely. See “Initiation of Nationwide First-Come, First-Served Digital Licensing for Low Power Television and TV Translators Postponed to July 26, 2010,” *Public Notice*, 24 FCC Rcd 14614 (MB 2009); see also “Initiation of Nationwide First-Come, First-Served Digital Licensing for Low Power Television and TV Translators Postponed Until Further Notice,” *Public Notice*, 25 FCC Rcd 8179 (MB 2010).

<sup>3</sup> Broadband Plan at 84.

<sup>4</sup> Broadband Plan at 88.

once again begin accepting these applications.

Applications that are currently permitted under our rules, such as applications for flash cut and digital companion channels filed by existing stations in the low power television service, will continue to be accepted. Furthermore, displacement applications will continue to be accepted where the applicant demonstrates actual interference from existing full-power television stations, as well as displacement applications filed by stations operating on channels 52 through 69.

For additional information or questions, please contact Hossein Hashemzadeh (technical) or Shaun Maher (legal) of the Video Division, Media Bureau at (202) 418-1600.
